Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-1539), Internet: infounit@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-004-XPB, is published quarterly as a standard paper product for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please order by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at (613) 951-7277 or 1 800 770-1033; by fax, at (613) 951-1584 or 1 800 889-9734; or by Internet, at order@statcan.ca. For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), (télécopieur : (613) 951-1539), Internet : infounit@stacan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 1984.

Highlights

Farm Input Price Index

First quarter 1998

Declining prices in seven of the nine categories pushed the Farm Input Price Index down 0.2% in the first quarter of 1998. Farmers in Eastern Canada benefited more from the lower prices (-1.4%).

By comparison, prices in Western Canada rose an average 0.8% on a quarterly basis, due mostly to higher costs for non-mortgage loans.

On a year-over-year basis, Canada's farmers paid only 1.4% more to do business. This is down significantly from the 2.6% annual price increase recorded in the fourth quarter of 1997.

(Figures for the first quarter of 1998 include estimated indexes for farm rent and property taxes. Also in this quarter, all indexes for the last two years were revised. The indexes for 1996 are now considered final.)

Second consecutive quarterly decrease

Although prices fell in seven of the nine input categories, the all-Canada total index dropped only 0.2% compared with the fourth quarter of 1997. Lower prices for prepared feed (-3.8%) and weanling pigs (-10.6%) contributed most to the quarterly decrease. However, these were significantly offset by higher prices elsewhere. Farmers paid more for grass-seed (+8.9%) and for potassium fertilizers (+2.5%). Also, the preliminary interest figures indicate the cost of non-mortgage interest rose again on a quarterly basis (+11.7%), resulting in an increase in the overall index for interest.

Farmers benefited from lower prices for building materials (-1.3%) and for supplies and services, particularly heating fuel (-3.1%) and electricity (-1.9%), compared with the previous three months.

Higher cattle prices pushed up the annual increase

On a national basis, farmers paid more annually in four of the nine categories. Similar to the fourth quarter of 1997, higher prices for feeder cattle (+21.2%) contributed most to the year-over-year increase to the total index. Those increases, however, were offset partially by lower prices for weanling pigs and egg-producing chicks.

Faits saillants

Indice des prix des entrées dans l'agriculture

Premier trimestre de 1998

Le recul des prix dans sept des neuf catégories a fait baisser l'indice total des prix des entrées dans l'agriculture de 0,2 % en trois mois. Les agriculteurs de l'Est ont profité davantage de la diminution de 1,4 % des prix.

En comparaison, les prix dans l'Ouest ont augmenté en moyenne de 0,8 % au cours du trimestre, surtout en raison des taux plus élevés des prêts non hypothécaires.

D'une année à l'autre, les agriculteurs canadiens n'ont payé que 1,4 % de plus pour mener leurs activités, ce qui est nettement inférieur à l'augmentation annuelle de 2,6 % des prix observée au quatrième trimestre de 1997.

Les chiffres du premier trimestre de 1998 comprennent les indices estimatifs des loyers agricoles et des taxes foncières. De plus, au cours de ce trimestre, tous les indices des deux dernières années ont fait l'objet d'une révision. Les indices de 1996 sont maintenant finalisés.

Deuxième diminution trimestrielle consécutive

Bien que les prix aient reculé dans sept des neuf catégories d'entrées, l'indice total n'a fléchi que de 0,2 % par rapport au quatrième trimestre de 1997. Les baisses de prix des aliments préparés (-3,8 %) et des porcelets sevrés (-10,6 %) ont contribué le plus à la diminution trimestrielle. Toutefois, ces baisses ont été largement atténuées par des hausses de prix ailleurs. Les agriculteurs ont payé plus cher les graines fourragères (+8,9 %) et les engrais de potassium (+2,5 %). En outre, les chiffres provisoires en ce qui a trait à l'intérêt révèlent que le coût de l'intérêt non hypothécaire a encore augmenté au cours du trimestre (+11,7 %), ce qui a entraîné une hausse de l'indice global de l'intérêt.

Les agriculteurs ont profité de la baisse des prix des matériaux de construction (-1,3 %) ainsi que des fournitures et des services, en particulier le combustible de chauffage (-3,1 %) et l'électricité (-1,9 %), par rapport aux trois mois précédents.

La hausse du prix des bovins a accentué l'augmentation annuelle

À l'échelle nationale, les agriculteurs ont fait face à une augmentation annuelle des prix dans quatre des neuf catégories. Comme au quatrième trimestre de 1997, la hausse du prix des bovins d'engraissement (+21,2 %) a contribué le plus à l'augmentation de l'indice total d'une année à l'autre. Les majorations de prix ont toutefois été partiellement compensées par la diminution de prix des porcelets sevrés et des poussins à oeufs.

Again, a higher index for non-mortgage loans pushed the interest index up on an annual basis (+18.4%). Farmers also faced price increases for new machinery.

On the other hand, farmers benefited from lower prices in the remaining input categories. Lower prices for nitrogen fertilizers helped to push the crop production index down. Price drops for heating fuel contributed to a 1.8% annual decrease in supply and services.

Estimated costs for farm rent were down 3.4%. Property taxes were estimated at 1.5% lower for the year.

Higher cattle and poultry prices for Western producers

In the West, farm input prices rose 1.6% on an annual basis, largely due to higher prices for feeder cattle (+23.5%). Farmers paid more for all inputs into animal production; the exceptions were weanling pigs (-30.9%) and prepared feed (-5.8%). Feeder livestock also carries more weight in the West's index than in the East's.

In the West, price declines in building materials (-4.2%), heating fuel (-8.8%) and nitrogen fertilizers (-14.2%) helped to offset significant increases in the cost of non-mortgage loans and in the estimate for property taxes on an annual basis.

In the East, where the overall annual price increase was marginally less (+1.3%), higher prices for tractors and other machinery pushed the machine and motor vehicles index up 1.4% compared with the same period a year earlier. Farm wages rose 2.4%, while the cost of interest jumped 16.2%, a result of higher costs for non-mortgage loans.

Farmers in Eastern Canada also faced higher prices for feeder cattle, but these were offset by lower prices for weanling pigs (-16.8%), egg-producing chicks (-5.1%) and prepared feed (-4.6%). Costs for property taxes and farm rent were also estimated to be significantly lower compared with the same period a year earlier.

Encore une fois, l'indice plus élevé des prêts non hypothécaires a fait augmenter l'indice annuel de l'intérêt (+18,4 %). Les agriculteurs ont également dû composer avec des hausses de prix des machines agricoles neuves.

Par ailleurs, les agriculteurs ont profité de la baisse des prix dans les autres catégories d'entrées. La réduction des prix des engrais d'azote a contribué au fléchissement de l'indice des cultures agricoles, tandis que la baisse des prix du combustible de chauffage a contribué au repli annuel de 1,8 % des prix des fournitures et des services.

Les coûts estimatifs des loyers agricoles et des taxes foncières ont été moins élevés de 3,4 % et de 1,5 % respectivement, pour l'année.

Haussse des prix des bovins et de la volaille pour les producteurs de l'Ouest

Dans l'Ouest, les prix des entrées dans l'agriculture ont augmenté de 1,6 % durant l'année, surtout en raison de la hausse des prix des bovins d'engraissement (+23,5 %). Les agriculteurs ont payé plus cher toutes les entrées dans l'élevage d'animaux, sauf les porcelets sevrés (-30,9 %) et les aliments préparés (-5,8 %). Les bovins d'engraissement pèsent également plus lourd dans l'indice de l'Ouest canadien que dans celui de l'Est.

Dans l'Ouest, les baisses de prix des matériaux de construction (-4,2 %), du combustible de chauffage (-8,8 %) et des engrais d'azote (-14,2 %) ont contribué à compenser d'importantes majorations du coût des prêts non hypothécaires et des taxes foncières estimatives pour l'année.

Dans l'Est, où l'augmentation annuelle globale des prix était légèrement inférieure (+1,3 %), la hausse des prix des tracteurs et d'autres machines agricoles s'est traduite par une augmentation de 1,4 % de l'indice des machines agricoles et des véhicules automobiles par rapport à la même période de l'année dernière. Les salaires agricoles ont augmenté de 2,4 % et le coût de l'intérêt a fait un bond de 16,2 % sous l'effet de la hausse des taux des prêts non hypothécaires.

Les agriculteurs de l'Est ont également payé plus cher les bovins d'engraissement, mais ces hausses ont été éponnées par des diminutions de prix des porcelets sevrés (-16,8 %), des poussins à oeufs (-5,1 %) et des aliments préparés (-4,6 %). Les coûts estimatifs des taxes foncières et des loyers agricoles étaient également bien inférieurs à ceux de la même période de l'année dernière.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t / p_o) w$$

where

où

$$w = 100 \times \frac{P_o Q_o}{\sum P_o Q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

SERVICES INDICATORS

For and About Businesses Serving the Business of Canada ...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, *Services Indicators* brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing **timely** updates on performance and developments in:

- Communications
- Finance, Insurance and Real Estate
- Business Services

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, *Services Indicators* gives you the complete picture for the first time!

Finally, anyone with a vested interest in the services economy can go to *Services Indicators* for **current** information on these industries ... both **at-a-glance** and **in more detail than has ever been available before** – all in one unique publication.

If your business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, *Services Indicators* is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to *Services Indicators* today!

Services Indicators (catalogue no. 63-016-XPB) is \$116 (plus GST/HST and applicable PST) in Canada, US\$116 in the United States and US\$116 in other countries.

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-800-889-9734 or (613) 951-1584 or call 1-800-267-6677 toll-free in Canada and the United States [(613) 951-7277 elsewhere] and charge to your VISA or MasterCard. Via Internet: order@statcan.ca. Visit our Web Site www.statcan.ca.

INDICATEURS DES SERVICES

Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur ESSENTIEL!

Le secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez **maintenant** ce tableau fragmentaire par l'image cohérente que vous offre *Indicateurs des services*. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus **opportuns** du rendement et des progrès dans les domaines suivants :

- Communications
- Finance, assurance et immobilier
- Services aux entreprises

Indicateurs des services rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de la production – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, *Indicateurs des services* brosse pour la première fois un tableau complet!

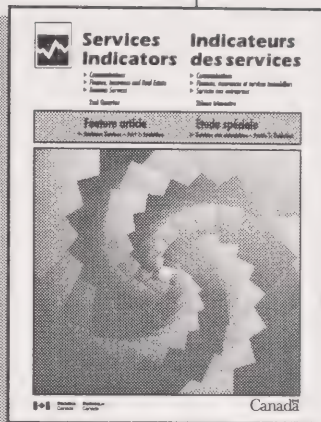

Enfin, quiconque s'intéresse au secteur des services peut consulter *Indicateurs des services* pour trouver des renseignements **courants** sur ces branches d'activité... tant sous une **forme sommaire** qu'à un **niveau de détail n'ayant jamais encore été offert** – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, *Indicateurs des services* représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles. Commandez dès aujourd'hui VOTRE abonnement à *Indicateurs des services*!

Indicateurs des services (n° 63-016-XPB au catalogue) coûte 116 \$ (plus TPS TVH et la TVP en vigueur) au Canada, 116 \$ US aux États-Unis et 116 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Gestion de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le 1-800-889-9734 ou le (613) 951-1584 ou téléphoner sans frais du Canada et des États-Unis au 1-800-267-6677 [ou d'ailleurs au (613) 951-7277] et porter les frais à votre compte VISA ou MasterCard. Via l'Internet: order@statcan.ca. Visitez notre site Internet www.statcan.ca.

Your essential tool for understanding agriculture in Canada

Whatever your interest in agriculture, the Census of Agriculture is your **Key Information Source** at Canada, provincial and small-area levels.

Census of Agriculture products and services are on track with your needs.

- Use **CUSTOM SERVICES** — such as custom tabulations and thematic maps — to gain unique insight *and* the competitive advantage. For information, call toll-free 1-800-465-1991 or (613) 951-2889.
- For speed and flexibility, key into the Census of Agriculture **CD-ROM** for all farm and farm operator variables.
- Look to **PUBLICATIONS** for easy-to-read tables and graphics plus straightforward analysis. The series includes *Historical Overview of Canadian Agriculture, Agricultural Profiles (Canada and provinces), Profile of Canadian Farm Operators and Canadian Agriculture at a Glance*.

Voici l'outil essentiel pour la personne désireuse de comprendre l'agriculture canadienne

Peu importe la nature de votre intérêt dans le domaine de l'agriculture, le Recensement de l'agriculture est la **principale source d'information** à l'échelle du Canada, des provinces et des régions.

Des produits et services qui répondent à vos besoins.

- Utilisez nos **SERVICES PERSONNALISÉS** — par exemple les totalisations spéciales et les cartes thématiques — pour obtenir des renseignements exclusifs *et* avoir un avantage sur vos concurrents. Pour en savoir plus, téléphonez sans frais au 1-800-465-1991 ou au (613) 951-2889.
- Pour la rapidité et la souplesse, introduisez le **CD-ROM** du Recensement de l'agriculture pour avoir accès à toutes les variables des fermes et aux caractéristiques des exploitants agricoles.
- Consultez les **PUBLICATIONS** pour trouver des tableaux et des graphiques faciles à lire et des analyses précises. La série comprend les publications suivantes : *Aperçu historique de l'agriculture canadienne, Profils agricoles (Canada et provinces), Profil des exploitants agricoles canadiens et Un coup d'oeil sur l'agriculture canadienne*.

Get the complete picture with the 1996 Census of Agriculture

To order the CD-ROM, call toll-free 1-800-465-1991 or (613) 951-2889.
To order publications, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your publications order to (613) 951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.
Via Internet: order@statcan.ca

Pour un tour d'horizon, ayez recours aux données du Recensement de l'agriculture de 1996

Pour commander le CD-ROM, téléphonez au 1-800-465-1991 ou au (613) 951-2889.
Pour commander les publications, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre des services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Vous pouvez aussi envoyer votre commande par télécopieur, au (613) 951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard. Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-1539), Internet: infounit@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-004-XPB, is published quarterly as a standard paper product for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please order by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at (613) 951-7277 or 1 800 770-1033; by fax, at (613) 951-1584 or 1 800 889-9734; or by Internet, at order@statcan.ca. For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinarolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), (télécopieur : (613) 951-1539), Internet : infounit@stacan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Revisions

The indexes are subject of a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 1984.

Highlights

Farm Input Price Index

Second quarter 1998

Falling prices helped push the all-Canada Farm Input Price Index down 0.8% in the second quarter - a time when farmers normally face price increases. The last time farmers benefitted from lower prices during the second quarter was in 1991, when the annual index fell 1.8%.

Prices of farm inputs fell 2.4% in the East on a year-over-year basis, while prices in the West rose 0.5%. For Canada as a whole, farm inputs dropped a marginal 0.1% between the first and second quarters of 1998, but it was farmers in the East who again benefitted more from the lower prices.

Prices for feed continue to drop

Nationally, farmers paid less in 4 of the 7 input categories surveyed in the second quarter compared with the same period a year earlier. The most significant decline occurred in the animal production component. Lower prices for feed, particularly prepared feed (-16.9%), contributed most to the year-over-year decline. Farmers also paid less for weanling pigs (-36.8%) and turkey poults (-0.4%). Although farmers continued to pay more in the second quarter for feeder cattle (+11.6%), this was significantly lower than the 21.2% annual increase recorded in the first quarter of 1998.

Lower prices for nitrogen fertilizer (-13.6%) and lower estimates for crop insurance (-4.2%) helped push the crop production index down. Farmers also paid less for heating fuel (-8.5%), which contributed to the annual decrease in supplies and services.

The preliminary interest figures indicate the cost of non-mortgage interest advanced 37.5% on an annual basis, which resulted in an increase in the overall cost of interest. Farmers also paid more for hired farm labour.

Prices fall in the East, increase in the West

Although farmers in the East paid substantially more for feeder cattle (+15.3%) on a year-over-year basis, this was offset by lower prices for weanling pigs and turkey poults. Once again, farmers benefitted from lower prices for prepared feed (-18.2%) and grain feed (-5.8%).

Faits saillants

Indice des prix des entrées dans l'agriculture

Deuxième trimestre de 1998

Au deuxième trimestre, moment où les agriculteurs se voient normalement infliger des hausses de prix, la baisse des prix a contribué au fléchissement de 0,8 % de l'indice des prix des entrées dans l'agriculture à l'échelle du Canada. Il faut remonter à 1991 pour observer un recul des prix au cours d'un deuxième trimestre; l'indice annuel avait alors reculé de 1,8 %.

Les prix des entrées dans l'agriculture ont fléchi de 2,4 % dans l'Est sur une base annuelle, tandis qu'ils ont grimpé de 0,5 % dans l'Ouest. Pour l'ensemble du Canada, les prix des entrées dans l'agriculture ont connu un léger recul de 0,1 % entre le premier et le deuxième trimestre de 1998, mais ce sont les agriculteurs de l'Est qui ont le plus profité de la baisse des prix.

Les prix des aliments pour animaux continuent de décliner

À l'échelle nationale, les agriculteurs ont payé leurs entrées moins cher dans quatre des sept catégories observées au cours du deuxième trimestre. La baisse la plus importante a touché la composante de l'élevage d'animaux. La diminution des prix des aliments pour animaux, et particulièrement des aliments préparés (-16,9 %), a été le principal facteur du recul d'une année à l'autre. Les agriculteurs ont aussi payé moins cher les porcelets sevrés (-36,8 %) et les dindonneaux (-0,4 %). Au cours du deuxième trimestre, les agriculteurs ont déboursé davantage pour les bovins d'engraissement (+11,6 %), mais cette hausse est restée bien en deçà de l'augmentation annuelle de 21,2 % observée au premier trimestre de 1998.

Les baisses des prix des engrais d'azote (-13,6 %) et des estimations de l'assurance-récolte (-4,2 %) ont contribué au fléchissement de l'indice des cultures agricoles. Les agriculteurs ont aussi payé moins cher leur combustible de chauffage (-8,5 %), ce qui a contribué à la diminution annuelle des prix des fournitures et des services.

Les chiffres provisoires pour l'intérêt indiquent que le coût de l'intérêt non hypothécaire a augmenté de 37,5 % sur une base annuelle, ce qui a entraîné une hausse du coût global de l'intérêt. Les agriculteurs ont aussi payé plus cher la main-d'oeuvre agricole salariée.

Les prix ont baissé dans l'Est et ont augmenté dans l'Ouest

Les agriculteurs de l'Est ont payé les bovins d'engraissement beaucoup plus cher (+15,3 %) que l'an dernier. Cependant, la baisse des prix des porcelets sevrés et des dindonneaux a compensé cette hausse. Encore une fois, les agriculteurs ont profité d'une baisse des prix des aliments préparés (-18,2 %) et des céréales fourragères (-5,8 %).

Prices were down for supplies and services, such as heating fuel (-9.3%), compared with the second quarter of 1997. Farmers paid less for building and fencing - the result of lower prices for building materials (-2.2%).

On the other hand, farmers in the East paid more for hired farm labour (+3.2%) and for powered machinery (+2.8%), such as tractors and combines, and non-powered machinery (+3.3%), such as plows and cultivators. The increases in machinery, however, were partially offset by lower prices for gasoline (-9.6%) and diesel fuel (-9.5%). Farmers faced higher costs for non-mortgage loans, which helped push the annual cost of interest up 23.3%.

Farmers in the West benefitted from lower prices for weanling pigs, prepared feed, and grain feed but not to the same extent as their eastern counterparts. Lower prices for nitrogen fertilizer (-14.1%) contributed most to the annual decrease in the crop production index (-3.6%).

Once again, higher prices for powered and non-powered machinery were offset by lower prices for gasoline (-10.9%) and diesel fuel (-13.1%). Similar to their eastern counterparts, farmers in the West faced higher prices for hired farm labour and increased interest costs due to higher costs for non-mortgage loans.

Marginal decrease in prices between first and second quarter

Nationally, farm input prices fell 0.1% in the second quarter of 1998 compared with the previous quarter. A 0.5% quarterly decline in input prices in the East was offset by a 0.5% advance in the West.

Higher prices for fertilizers contributed most to the increase in the crop production index. Also, higher costs for non-mortgage loans (+8.1%) pushed the interest index up 5.6% from the first to the second quarter. Farmers paid less for inputs for animal production - the result of lower prices for feed (-8.0%). Lower heating fuel prices helped push the index for supplies and services down 0.8%.

Par rapport au deuxième trimestre de 1997, les prix ont reculé pour les fournitures et les services comme le combustible de chauffage (-9,3 %). Les agriculteurs ont payé moins cher les bâtiments et les clôtures en raison d'une diminution des prix des matériaux de construction (-2,2 %).

Par contre, les agriculteurs de l'Est ont payé plus cher la main-d'oeuvre agricole salariée (+3,2 %), les machines motorisées (+2,8 %), comme les tracteurs et les moissonneuses-batteuses, et les machines non motorisées (+3,3 %), comme les charrues et les cultivateurs. Les hausses relatives aux machines ont toutefois été partiellement neutralisées par la baisse des prix de l'essence (-9,6 %) et du carburant diesel (-9,5 %). Les agriculteurs ont dû composer avec l'augmentation des coûts des prêts non hypothécaires qui a fait progresser de 23,3 % le coût annuel de l'intérêt.

Les agriculteurs de l'Ouest ont profité d'une baisse de prix des porcelets sevrés, des aliments préparés et des céréales fourragères, mais dans une moindre mesure que leurs homologues de l'Est. La diminution des prix des engrais d'azote (-14,1 %) est le facteur qui a le plus contribué à la diminution annuelle de l'indice des cultures agricoles (-3,6 %).

Encore une fois, l'augmentation des prix des machines motorisées et non motorisées a été contrebalancée par la baisse des prix de l'essence (-10,9 %) et du carburant diesel (-13,1 %). Comme leurs homologues de l'Est, les agriculteurs de l'Ouest ont subi une hausse du prix de la main-d'oeuvre agricole salariée et une augmentation des coûts d'intérêt en raison de la hausse des coûts des prêts non hypothécaires.

Légère diminution des prix entre le premier et le deuxième trimestre

Par rapport au trimestre précédent, les prix des entrées dans l'agriculture ont baissé, à l'échelle nationale, de 0,1 % au cours du deuxième trimestre de 1998. La baisse trimestrielle de 0,5 % des prix des entrées dans l'Est a été contrebalancée par la hausse de 0,5 % dans l'Ouest.

L'augmentation des prix des engrais est celle qui a le plus contribué à la progression de l'indice des cultures agricoles. De même, la hausse des coûts des prêts non hypothécaires (+8,1 %) a fait augmenter de 5,6 % l'indice de l'intérêt entre le premier et le deuxième trimestre. Les agriculteurs ont payé moins cher les entrées pour l'élevage d'animaux, résultat d'une diminution des prix des aliments (-8,0 %). La baisse de prix du combustible de chauffage a contribué au fléchissement de 0,8 % de l'indice des fournitures et des services.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t / p_o) w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

Agriculture Statistics at work for you

Did you know that Statistics Canada's **Agriculture Division** provides many of its clients with **special services** tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with **the data you need to make important decisions as an agri-business specialist**.

SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require. You can pick and choose the variables from one or more of our databases and receive them in a format that **best suits your needs**.

ANALYTICAL STUDIES

Require in-depth analysis of the data that affect your industry or market? Agriculture Division's specialized team of professionals has the hands-on experience in data analysis **you want working for you**.

CUSTOM SURVEYS

Do you need information that no one has but you don't know how to get it? Agriculture Division can conduct a special survey or expand on an existing one **just for you**.

Find out for yourself what many agriculture professionals have known for years — Statistics Canada has the know-how and expertise to get the job done!

Les statistiques agricoles à votre service

Saviez-vous que la **Division de l'agriculture** de Statistique Canada fournit à un grand nombre de ses clients des **services spéciaux** qui sont adaptés à leurs besoins en matière de données? La Division puise à même une vaste gamme de renseignements pour vous fournir **les données qu'il vous faut pour prendre des décisions importantes en tant que spécialiste de l'agroalimentaire**.

TOTALISATIONS SPÉCIALES

Vous cherchez des données précises sur l'agriculture pour vous aider dans votre travail quotidien? La Division de l'agriculture peut vous fournir des tableaux et des rapports personnalisés qui renferment les données requises. Vous pouvez choisir les variables qui vous intéressent à partir de l'une ou plusieurs de nos bases de données et recevoir les totalisations sous la forme **qui répond le mieux à vos besoins**.

ÉTUDES ANALYTIQUES

Vous voulez une analyse approfondie des données qui touchent votre industrie ou votre marché? L'équipe de spécialistes de la Division de l'agriculture possède l'expérience pratique de l'analyse des données **dont vous avez besoin**.

ENQUÊTES PERSONNALISÉES

Vous voulez des renseignements inédits mais vous ne savez pas comment les obtenir? La Division de l'agriculture peut mener une enquête spéciale ou élargir la portée d'une enquête existante, **uniquement pour vous**.

Ne râtez pas l'occasion de découvrir ce que bien des professionnels du domaine de l'agriculture savent depuis des années - Statistique Canada

Centres de consultation régionaux de Statistique Canada :

Your essential tool for understanding agriculture in Canada

Whatever your interest in agriculture, the Census of Agriculture is your **Key Information Source** at Canada, provincial and small-area levels.

Census of Agriculture products and services are on track with your needs.

- Use **CUSTOM SERVICES** — such as custom tabulations and thematic maps — to gain unique insight *and* the competitive advantage. For information, call toll-free 1-800-465-1991 or (613) 951-2889.
- For speed and flexibility, key into the Census of Agriculture **CD-ROM** for all farm and farm operator variables.
- Look to **PUBLICATIONS** for easy-to-read tables and graphics plus straightforward analysis. The series includes *Historical Overview of Canadian Agriculture*, *Agricultural Profiles (Canada and provinces)*, *Profile of Canadian Farm Operators and Canadian Agriculture at a Glance*.

Voici l'outil essentiel pour la personne désireuse de comprendre l'agriculture canadienne

Peu importe la nature de votre intérêt dans le domaine de l'agriculture, le Recensement de l'agriculture est la **principale source d'information** à l'échelle du Canada, des provinces et des régions.

Des produits et services qui répondent à vos besoins.

- Utilisez nos **SERVICES PERSONNALISÉS** — par exemple les totalisations spéciales et les cartes thématiques — pour obtenir des renseignements exclusifs *et* avoir un avantage sur vos concurrents. Pour en savoir plus, téléphonez sans frais au 1-800-465-1991 ou au (613) 951-2889.
- Pour la rapidité et la souplesse, introduisez le **CD-ROM** du Recensement de l'agriculture pour avoir accès à toutes les variables des fermes et aux caractéristiques des exploitants agricoles.
- Consultez les **PUBLICATIONS** pour trouver des tableaux et des graphiques faciles à lire et des analyses précises. La série comprend les publications suivantes : *Aperçu historique de l'agriculture canadienne*, *Profil agricole (Canada et provinces)*, *Profil des exploitants agricoles canadiens* et *Un coup d'oeil sur l'agriculture canadienne*.

Get the complete picture with the 1996 Census of Agriculture

To order the CD-ROM, call toll-free 1-800-465-1991 or (613) 951-2889.
To order publications, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication.
If more convenient, fax your publications order to (613) 951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.
Via Internet: order@statcan.ca

Pour un tour d'horizon, ayez recours aux données du Recensement de l'agriculture de 1996

Pour commander le CD-ROM, téléphonez au 1-800-465-1991 ou au (613) 951-2889.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordnolingue et le système d'extraction de Statistique Canada.

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» – «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Highlights

Farm Input Price Index

Third quarter 1998

The all-Canada Farm Input Price Index was down 1.8% in the third quarter compared with the same period in 1997, due to declining prices in five of the seven input categories surveyed. This was the second consecutive quarter where farmers have benefitted from lower prices, mostly as a result of lower prices for inputs into animal production such as feeder cattle and feed. The decrease occurred despite a 25.2% increase in the cost of interest.

Although the overall index fell 1.0% between the second and third quarters of 1998, farmers in the West benefitted more from lower prices.

Lower prices for feeder cattle contribute most to annual decrease

Nationally, farmers benefitted from lower prices for inputs into animal production such as feeder cattle (-3.1%) and grain feed (-11.3%) compared with the same period a year earlier. Those decreases, however, were offset partially by higher prices for broiler chicks (+3.1%) and artificial insemination (+1.9%).

Lower prices for fertilizer, particularly nitrogen fertilizer (-13.5%), contributed most to the decrease in crop production. Farmers paid less for supplies and services, such as heating fuel and electricity, and also benefitted from lower prices for building materials, which contributed to the annual decrease in building and fencing.

On the other hand, a higher index for non-mortgage loans pushed the preliminary interest index up on an annual basis (+25.2%). Farmers continued to pay higher prices for powered machinery (+2.8%), such as tractors and combines, and non-powered machinery (+3.2%) on a year-over-year basis. These increases, however, were offset by lower prices for gasoline (-12.0%) and diesel fuel (-14.3%).

Lower cattle, fertilizer prices for Western farmers

In the West, farm input prices fell 1.6% on an annual basis, largely due to lower prices for feeder cattle (-6.7%) and weanling pigs (-32.9%). Prices were also down for inputs into crop production - a result of lower prices for nitrogen fertilizers (-13.9%).

Faits Saillants

Indice des prix des entrées dans l'agriculture

Troisième trimestre de 1998

Au troisième trimestre, la baisse des prix dans cinq des sept catégories d'entrées observées s'est traduite par un recul de 1,8 % de l'indice des prix des entrées dans l'agriculture à l'échelle du Canada par rapport à la période correspondante de l'année précédente. Il s'agit du deuxième trimestre consécutif où les agriculteurs ont profité d'une baisse des prix; celle-ci est attribuable en grande partie à la baisse des prix des entrées dans l'élevage d'animaux, comme les bovins d'engraissement et les aliments pour animaux. Cette diminution est survenue en dépit d'une augmentation de 25,2 % des frais d'intérêt.

L'indice d'ensemble a chuté de 1,0 % du deuxième au troisième trimestre de 1998, mais ce sont les agriculteurs de l'Ouest qui ont profité le plus de la baisse des prix.

La baisse des prix des bovins d'engraissement a contribué en grande partie à la diminution annuelle

À l'échelle nationale, les agriculteurs ont profité d'une baisse des prix des entrées dans l'élevage d'animaux tels que les bovins d'engraissement (-3,1 %) et les céréales fourragères (-11,3 %) comparativement à la même période l'an dernier. Toutefois, ces diminutions ont été compensées en partie par une hausse des prix des poussins à griller (+3,1 %) et de l'insémination artificielle (+1,9 %).

La baisse des prix des engrais, en particulier des engrais d'azote (-13,5 %), a contribué le plus au recul des cultures agricoles. Les agriculteurs ont déboursé moins pour les fournitures et services, comme le combustible de chauffage et l'électricité. Ils ont également profité d'une baisse des prix des matériaux de construction, laquelle a contribué à la diminution annuelle des coûts des bâtiments et clôtures.

Par contre, l'indice plus élevé pour les prêts non hypothécaires s'est traduit par une hausse de l'indice de l'intérêt provisoire sur une base annuelle (+25,2 %). D'une année à l'autre, les agriculteurs ont continué de payer plus cher les machines motorisées (+2,8 %), comme les tracteurs et les moissonneuses, ainsi que les machines non motorisées (+3,2 %). Ces augmentations ont toutefois été compensées par une baisse des prix de l'essence (-12,0 %) et du carburant diesel (-14,3 %).

Baisse des prix des bovins et des engrais pour les agriculteurs de l'Ouest

Dans l'Ouest, les prix des entrées dans l'agriculture ont chuté de 1,6 % annuellement, phénomène attribuable en grande partie à la baisse des prix des bovins d'engraissement (-6,7 %) et des porcelets sevrés (-32,9 %). Les prix des entrées des cultures agricoles sont également en baisse, par suite d'une diminution des prix des engrais d'azote (-13,9 %).

Once again, prices were down for supplies and services, such as heating fuel and electricity, compared with the third quarter of 1997. Along with lower prices for hired farm labour, farmers in the West benefitted from lower prices for building materials, which contributed to the decrease in building and fencing. Preliminary interest figures indicate that farmers faced higher costs for non-mortgage loans, which resulted in an increase in the overall cost of interest.

In the East, where the overall price decrease was marginally more (-2.0%), lower prices for weanling pigs (-16.8%) and prepared feed (-14.7%) pushed the animal production index down on an annual basis. The prices for feeder cattle, however, were up 1.5% compared with the same period a year earlier. Farm wages rose 2.3% and the preliminary figures indicate that the cost of interest jumped as a result of higher costs for non-mortgage loans.

Farmers benefit from lower prices for cattle and grain feed on a quarterly basis

For Canada as a whole, farm input prices fell 1.0% compared with the second quarter of 1998. Prices fell in five of the seven input categories surveyed. Lower prices for feeder cattle and grain feed helped push the animal production index down (-3.2%).

Farmers benefitted from lower prices for hired farm labour and for supplies and services compared with the previous quarter.

Western producers benefitted most from the quarterly decrease (-1.5%) compared with producers in the East (-0.5%). Although both regions benefitted from lower prices for inputs into animal production, in particular feeder cattle and feed, the animal production index carries more weight in the West than in the East.

Comparativement au troisième trimestre de 1997, les prix ont fléchi à nouveau pour les fournitures et services, comme le combustible de chauffage et l'électricité. En plus d'avoir profité d'une baisse des prix de la main-d'oeuvre agricole salariée, les agriculteurs de l'Ouest ont pu retirer les avantages d'une baisse des prix des matériaux de construction, ce qui a contribué à une diminution des coûts des bâtiments et clôtures. Pour ce qui est de l'intérêt, les chiffres provisoires indiquent que les agriculteurs ont dû faire face à une hausse du coût des prêts non hypothécaires, ce qui a donné lieu à une augmentation des frais d'intérêt globaux.

Dans l'Est, où la diminution globale des prix était légèrement supérieure (-2,0 %), la baisse des prix des porcelets sevrés (-16,8 %) et des aliments préparés (-14,7 %) s'est traduite par une baisse de l'indice annuel de l'élevage d'animaux. Les prix des bovins d'engraissement étaient toutefois en hausse de 1,5 % comparativement à la même période l'année dernière. Les salaires agricoles ont augmenté de 2,3 % et les chiffres provisoires indiquent que le coût des intérêts a augmenté par suite d'une augmentation du coût des prêts non hypothécaires.

Les agriculteurs ont profité d'une baisse trimestrielle des prix des bovins et des céréales fourragères

À l'échelle nationale, les prix des entrées dans l'agriculture ont chuté de 1,0 % au troisième trimestre comparativement au deuxième. Les prix ont chuté dans cinq des sept catégories d'entrées observées. La baisse des prix des bovins d'engraissement et des céréales fourragères a contribué à la baisse de l'indice de l'élevage d'animaux (-3,2 %).

Par rapport au trimestre précédent, les agriculteurs ont profité d'une baisse des prix de la main-d'oeuvre agricole salariée et des fournitures et services.

Les producteurs de l'Ouest ont profité davantage de la diminution trimestrielle (-1,5 %) que les producteurs de l'Est (-0,5 %). Bien que les deux régions aient profité d'une baisse des prix des entrées dans l'élevage d'animaux, en particulier des bovins d'engraissement et des céréales, l'indice de l'élevage d'animaux occupe une place plus importante dans l'Ouest que dans l'Est.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

TABLEAU - 2

Indices de prix des entrées dans l'agriculture (1986=100)⁽¹⁾

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$l_{i/0} = \sum (p_i/p_o)w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

THANK YOU FOR YOUR ORDER!

Statistics Canada
Statistique Canada

Canada

Canadă

Your essential tool for understanding agriculture in Canada

Whatever your interest in agriculture, the Census of Agriculture is your **Key Information Source** at Canada, provincial and small-area levels.

Census of Agriculture products and services are on track with your needs.

- Use **CUSTOM SERVICES** — such as custom tabulations and thematic maps — to gain unique insight *and* the competitive advantage. For information, call toll-free 1-800-465-1991 or (613) 951-2889.
- For speed and flexibility, key into the Census of Agriculture **CD-ROM** for all farm and farm operator variables.
- Look to **PUBLICATIONS** for easy-to-read tables and graphics plus straightforward analysis. The series includes *Historical Overview of Canadian Agriculture*, *Agricultural Profiles (Canada and provinces)*, *Profile of Canadian Farm Operators* and *Canadian Agriculture at a Glance*.

Get the complete picture with the 1996 Census of Agriculture

To order the CD-ROM, call toll-free 1-800-465-1991 or (613) 951-2889.
To order publications, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your publications order to (613) 951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.
Via Internet: order@statcan.ca

Voici l'outil essentiel pour la personne désireuse de comprendre l'agriculture canadienne

Peu importe la nature de votre intérêt dans le domaine de l'agriculture, le Recensement de l'agriculture est la **principale source d'information** à l'échelle du Canada, des provinces et des régions.

Des produits et services qui répondent à vos besoins.

- Utilisez nos **SERVICES PERSONNALISÉS** — par exemple les totalisations spéciales et les cartes thématiques — pour obtenir des renseignements exclusifs *et* avoir un avantage sur vos concurrents. Pour en savoir plus, téléphonez sans frais au 1-800-465-1991 ou au (613) 951-2889.
- Pour la rapidité et la souplesse, introduisez le **CD-ROM** du Recensement de l'agriculture pour avoir accès à toutes les variables des fermes et aux caractéristiques des exploitants agricoles.
- Consultez les **PUBLICATIONS** pour trouver des tableaux et des graphiques faciles à lire et des analyses précises. La série comprend les publications suivantes : *Aperçu historique de l'agriculture canadienne*, *Profil agricole (Canada et provinces)*, *Profil des exploitants agricoles canadiens* et *Un coup d'oeil sur l'agriculture canadienne*.

Pour un tour d'horizon, ayez recours aux données du Recensement de l'agriculture de 1996

Pour commander le CD-ROM, téléphonez au 1-800-465-1991 ou au (613) 951-2889.
Pour commander les publications, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre des services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Vous pouvez aussi envoyer votre commande par télécopieur, au (613) 951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard. Par l'entremise d'Internet : order@statcan.ca

Agriculture Statistics at work for you

Did you know that Statistics Canada's **Agriculture Division** provides many of its clients with **special services** tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with **the data you need to make important decisions as an agri-business specialist**.

SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require. You can pick and choose the variables from one or more of our databases and receive them in a format that **best suits your needs**.

ANALYTICAL STUDIES

Require in-depth analysis of the data that affect your industry or market? Agriculture Division's specialized team of professionals has the hands-on experience in data analysis **you want working for you**.

CUSTOM SURVEYS

Do you need information that no one has but you don't know how to get it? Agriculture Division can conduct a special survey or expand on an existing one **just for you**.

Find out for yourself what many agriculture professionals have known for years — Statistics Canada has the know-how and expertise to get the job done!

Les statistiques agricoles à votre service

Saviez-vous que la **Division de l'agriculture** de Statistique Canada fournit à un grand nombre de ses clients des **services spéciaux** qui sont adaptés à leurs besoins en matière de données? La Division puise à même une vaste gamme de renseignements pour vous fournir **les données qu'il vous faut pour prendre des décisions importantes en tant que spécialiste de l'agroalimentaire**.

TOTALISATIONS SPÉCIALES

Vous cherchez des données précises sur l'agriculture pour vous aider dans votre travail quotidien? La Division de l'agriculture peut vous fournir des tableaux et des rapports personnalisés qui renferment les données requises. Vous pouvez choisir les variables qui vous intéressent à partir de l'une ou plusieurs de nos bases de données et recevoir les totalisations sous la forme **qui répond le mieux à vos besoins**.

ÉTUDES ANALYTIQUES

Vous voulez une analyse approfondie des données qui touchent votre industrie ou votre marché? L'équipe de spécialistes de la Division de l'agriculture possède l'expérience pratique de l'analyse des données **dont vous avez besoin**.

ENQUÊTES PERSONNALISÉES

Vous voulez des renseignements inédits mais vous ne savez pas comment les obtenir? La Division de l'agriculture peut mener une enquête spéciale ou élargir la portée d'une enquête existante, **uniquement pour vous**.

Ne ratez pas l'occasion de découvrir ce que bien des professionnels du domaine de l'agriculture savent depuis des années - Statistique Canada

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-1539), Internet: infounit@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-004-XPB, is published quarterly as a standard paper product for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please order by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at **(613) 951-7277** or **1 800 770-1033**; by fax, at **(613) 951-1584** or **1 800 889-9734**; or by Internet, at order@statcan.ca. For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences — Permanence of Paper for Printed Library Materials, ANSI Z39.48 — 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» — «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

Note to readers

The first quarter of 1999 will be the last for which the Farm Input Price Index (FIPI) series will be calculated and published under the present structure and format. Beginning with the second quarter of 1999, price indexes related to farm input will be estimated for a selection of aggregated commodities for Canada and eastern and western regions for the sole purpose of deflation of the national accounts. Given the reduction in scope, coverage and quality of the FIPI program, users are advised not to use the indexes for forecasting net farm income or monitoring and establishing prices for selected inputs.

The publication, Farm input price indexes (62-004-XPB), will be discontinued after the first quarter of 1999. However, the data on the reduced indexes will be available on CANSIM like other national accounts deflators.

Western Canada and Eastern Canada are defined as provinces either west or east of the Manitoba/Ontario border.

Note aux lecteurs

Les utilisateurs sont priés de noter que le premier trimestre de 1999 sera le dernier pour lequel la série de l'Indice des prix des entrées dans l'agriculture (IPEA) sera établie et publiée selon sa structure et sa présentation actuelles. À compter du deuxième trimestre, les indices de prix liés aux entrées dans l'agriculture seront estimés pour certains groupes de marchandises pour le Canada, avec répartition entre l'Est et l'Ouest, à la seule fin du dégonflement des comptes nationaux. Compte tenu de la réduction de la portée, de la couverture et de la qualité du programme de l'IPEA, les utilisateurs sont avisés de ne pas utiliser les indices pour faire des prévisions du revenu agricole net ou pour surveiller et établir les prix de certaines entrées.

La publication Indices des prix des entrées dans l'agriculture (62-004-XPB) cessera de paraître après le premier trimestre de 1999. Cependant, les données sur les indices réduits seront stockées dans CANSIM, comme les autres dégonfleurs des comptes nationaux.

Dans le présent communiqué, l'Ouest canadien et l'Est canadien représentent les provinces situées à l'ouest ou à l'est de la frontière entre le Manitoba et l'Ontario.

Highlights

Farm Input Price Index

Fourth quarter 1998

For the third consecutive quarter, falling prices for inputs of animal production such as feeder livestock and feed helped push the all-Canada Farm Input Price Index down 1.4% in the fourth quarter of 1998 compared with the same period in 1997.

Farmers in Eastern Canada benefited more from the lower prices (-2.9%) while Western farmers faced virtually no overall price change (-0.1%).

On a quarterly basis, higher prices for machinery and motor vehicles and non-mortgage interest were offset partially by lower prices for inputs into animal production and crop production. As a result, there was a slight increase in the overall index in the fourth quarter of 1998 compared with the third quarter.

Feed prices continue to tumble in the fourth quarter

Lower prices for prepared feed (-19.0%) contributed most to the year-over-year decrease. Nationally, farmers paid less in four of the seven input categories surveyed.

Farmers paid less for supplies and services such as electricity and heating fuel as well as for building and fencing, mainly due to lower prices for building materials.

With the introduction of the 1999 model year, prices rose in the fourth quarter compared with the fourth quarter of 1997 for powered machinery, non-powered machinery and motor vehicle replacement. However, these were offset by lower prices for gasoline and diesel fuel.

Preliminary figures indicate the cost of non-mortgage interest jumped 32.2% on an annual basis, which increased the overall cost of interest. Farmers also paid more for hired farm labour.

Farmers in the East benefit more from lower prices

In the East, farm input prices fell on an annual basis, due mostly to lower prices for prepared feed (-20.8%). Farmers also benefited from lower prices for weanling pigs but faced higher prices for feeder cattle.

In addition to higher farm wages, farmers in the East paid more for powered and non-powered machinery (+3.7%). These increases, however, were offset partially by lower

Faits Saillants

Indice des prix des entrées dans l'agriculture

Quatrième trimestre de 1998

Pour le troisième trimestre consécutif, la chute des prix des entrées dans l'élevage d'animaux, comme le bétail d'engraissement et les aliments pour animaux, a contribué à infléchir l'indice des prix des entrées dans l'agriculture à l'échelle du Canada (-1,4 %) au quatrième trimestre de 1998 par rapport à la même période un an plus tôt.

Les agriculteurs de l'Est canadien ont profité davantage de la baisse des prix (-2,9 %) que ceux de l'Ouest, qui n'ont connu à peu près aucune variation de prix dans l'ensemble (-0,1 %).

Pour le trimestre, la progression des prix des machines et véhicules automobiles et des taux d'intérêt non hypothécaires a été partiellement compensée par le recul des prix des entrées dans l'élevage d'animaux et des cultures agricoles. Par conséquent, l'indice d'ensemble a avancé légèrement au quatrième trimestre de 1998 par rapport au trimestre précédent.

Les prix des aliments pour animaux continuent leur dégringolade au quatrième trimestre

La baisse des prix des aliments préparés (-19,0 %) est le facteur qui a contribué le plus à la diminution d'une année à l'autre. À l'échelle nationale, les agriculteurs ont payé moins cher les entrées de quatre des sept catégories observées.

Les agriculteurs ont payé moins cher les fournitures et les services, par exemple l'électricité et le combustible de chauffage, les bâtiments et les clôtures, en raison, pour une bonne part, de la baisse des prix des matériaux de construction.

Avec le lancement des modèles 1999, les prix ont augmenté au quatrième trimestre pour les machines motrices, les machines tractées et le remplacement de véhicules automobiles par rapport à la même période un an plus tôt. Cependant, ces augmentations ont été annulées par des baisses du prix de l'essence et du carburant diesel.

Les données provisoires révèlent que le coût des intérêts non hypothécaires a fait un bond de 32,2 % en chiffre annuel, ce qui a propulsé le coût global des intérêts. Les agriculteurs ont aussi payé plus cher leur main-d'œuvre agricole salariée.

Les agriculteurs de l'Est profitent davantage de la baisse des prix

Dans l'Est, les prix des entrées dans l'agriculture ont chuté, en chiffres annuels, à la faveur surtout de la baisse des prix des aliments préparés (-20,8 %). Les agriculteurs ont aussi profité d'un recul des prix des porcelets sevrés, mais ont dû payer plus cher leurs bovins d'engraissement.

Avec l'augmentation des salaires agricoles, les agriculteurs de l'Est ont payé plus cher leurs machines motrices et tractées (+3,7 %). Ces augmentations, toutefois, ont été partiellement

prices for gasoline (-13.2%) and diesel fuel (-12.1%) compared with the same period in 1997. Also, preliminary figures indicate that the cost of interest jumped as a result of higher costs for non-mortgage loans.

Farmers in the West also benefited from lower prices but not to the same extent as their eastern counterparts. Once again, they paid less for animal production inputs as prices declined for prepared feed and weanling pigs.

Farmers in the West paid less compared with the same period a year earlier for building materials, and supplies and services such as electricity (-5.7%) and heating fuel (-9.8%). Similar to the situation in the East, higher prices for machinery replacement were offset by lower prices for gasoline and diesel fuel. Farm wages rose and preliminary figures indicate that farmers faced higher costs for non-mortgage loans (+32.7%).

Marginal price increase between third and fourth quarters

Nationally, farmers paid more in five of the seven input categories surveyed. The overall farm input price index rose a marginal 0.1% between the third and fourth quarters of 1998.

Farmers faced higher prices for machinery replacement, diesel fuel and farm wages. Higher costs for non-mortgage loans (+4.7%) pushed preliminary values for the interest index up from the third to the fourth quarter.

On the other hand, farmers paid less for inputs into animal production - the result of lower prices for prepared feed and weanling pigs. Also, lower prices for fertilizers, particularly nitrogen fertilizers (-5.8%), contributed most to the decrease in crop production on a quarterly basis.

annulées par des baisses du prix de l'essence (-13,2 %) et du carburant diesel (-12,1 %) par rapport à la même période un an plus tôt. De même, les chiffres provisoires indiquent que le coût des intérêts a fait un bond, conséquence de l'augmentation des coûts des prêts non hypothécaires.

Les agriculteurs de l'Ouest ont eux aussi profité de baisses de prix, mais pas autant que leurs homologues de l'Est. Encore une fois, ils ont payé moins cher les entrées dans l'élevage d'animaux, à la faveur d'une diminution des prix des aliments préparés et des porcelets sevrés.

Les agriculteurs de l'Ouest ont payé moins cher les matériaux de construction et les fournitures et services, comme l'électricité (-5,7 %) et le combustible de chauffage (-9,8 %), par rapport à la même période un an plus tôt. Comme dans l'Est, l'augmentation de prix du remplacement de machines a été compensée par la baisse des prix de l'essence et du carburant diesel. Les salaires agricoles ont augmenté et les données provisoires révèlent que les agriculteurs ont dû faire face à des coûts plus élevés pour les prêts non hypothécaires (+32,7 %).

Légère augmentation des prix du troisième au quatrième trimestre

A l'échelle nationale, les agriculteurs ont subi des hausses de prix en ce qui concerne les entrées de cinq des sept catégories observées, et l'indice d'ensemble des prix des entrées dans l'agriculture a avancé d'à peine 0,1 % du troisième au quatrième trimestre de 1998.

Les agriculteurs ont fait face à des hausses de prix pour le remplacement de machines, le carburant diesel et les salaires agricoles. L'augmentation des coûts des prêts non hypothécaires (+4,7 %) a propulsé les valeurs provisoires pour l'indice des intérêts du troisième au quatrième trimestre.

Par ailleurs, les agriculteurs ont payé moins cher les entrées dans l'élevage d'animaux, conséquence d'une baisse de prix des aliments préparés et des porcelets sevrés. De même, la baisse des prix des engrais, et particulièrement des engrais d'azote (-5,8 %), est le facteur qui a le plus contribué à la diminution dans les cultures agricoles, en chiffres trimestriels.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t/p_o)w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

MERCI DE VOTRE COMMANDE!

Statistique Canada Statistics Canada

Canada

Your essential tool for understanding agriculture in Canada

Whatever your interest in agriculture, the Census of Agriculture is your **Key Information Source** at Canada, provincial and small-area levels.

Census of Agriculture products and services are on track with your needs.

- Use **CUSTOM SERVICES** — such as custom tabulations and thematic maps — to gain unique insight and the competitive advantage. For information, call toll-free 1-800-465-1991 or (613) 951-2889.
- For speed and flexibility, key into the Census of Agriculture **CD-ROM** for all farm and farm operator variables.
- Look to **PUBLICATIONS** for easy-to-read tables and graphics plus straightforward analysis. The series includes *Historical Overview of Canadian Agriculture*, *Agricultural Profiles (Canada and provinces)*, *Profile of Canadian Farm Operators* and *Canadian Agriculture at a Glance*.

Voici l'outil essentiel pour la personne désireuse de comprendre l'agriculture canadienne

Peu importe la nature de votre intérêt dans le domaine de l'agriculture, le Recensement de l'agriculture est la **principale source d'information** à l'échelle du Canada, des provinces et des régions.

Des produits et services qui répondent à vos besoins.

- Utilisez nos **SERVICES PERSONNALISÉS** — par exemple les totalisations spéciales et les cartes thématiques — pour obtenir des renseignements exclusifs et avoir un avantage sur vos concurrents. Pour en savoir plus, téléphonez sans frais au 1-800-465-1991 ou au (613) 951-2889.
- Pour la rapidité et la souplesse, introduisez le **CD-ROM** du Recensement de l'agriculture pour avoir accès à toutes les variables des fermes et aux caractéristiques des exploitants agricoles.
- Consultez les **PUBLICATIONS** pour trouver des tableaux et des graphiques faciles à lire et des analyses précises. La série comprend les publications suivantes : *Aperçu historique de l'agriculture canadienne*, *Profil agricole (Canada et provinces)*, *Profil des exploitants agricoles canadiens* et *Un coup d'oeil sur l'agriculture canadienne*.

Get the complete picture with the 1996 Census of Agriculture

To order the CD-ROM, call toll-free 1-800-465-1991 or (613) 951-2889.
To order publications, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your publications order to (613) 951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.
Via Internet: order@statcan.ca

Pour un tour d'horizon, ayez recours aux données du Recensement de l'agriculture de 1996

Pour commander le CD-ROM, téléphonez au 1-800-465-1991 ou au (613) 951-2889.
Pour commander les publications, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre des services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Vous pouvez aussi envoyer votre commande par télécopieur, au (613) 951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard. Par l'entremise d'Internet : order@statcan.ca

Agriculture Statistics at work for you

Did you know that Statistics Canada's **Agriculture Division** provides many of its clients with **special services** tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with **the data you need to make important decisions as an agri-business specialist**.

SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require.
